Set Your Goals for 2022!

Goals for 2022 should be recorded in Workday. Please set up time for you and your manager to align on your goals for this year.

Here are a few pointers:

- Create Specific, Measurable, Aligned, Realistic and Time bound (SMART) goals aligned with your manager and matrix manager (if applicable).
- Set challenging goals that align with company objectives and the business strategy.
- Limit goals to the vital few (three to five) that will help drive the achievement of our business objectives
- If you have a matrix manager, the matrix manager should provide input and sign off on your goals as well.

Cyber Hacks - Tax Phishing Scam

Tax season is also the time when phishing agents look forward to a whole lot of good catches. Phishing baits are sent out as emails to many recipients, many of whom fall for it, leading to a catastrophe. Malicious actors use the information to defraud the victim or even steal their identity.

The IRS does not initiate contact via email, text message, or use social media channels; they do not demand, make threats, or ask people for PIN numbers, passwords, or other personal information for their credit card, bank, or other financial accounts.

Tips to keep in mind If you receive a suspicious email claiming to be from the IRS:

- Use a secure internet connection (HTTPS) if you file your taxes electronically.
- Don't click links or attachments in an unsolicited email or text message about your tax return.
- The IRS will not call you threatening legal action. If you receive a call like this, hang up immediately.
- Report suspicious phone calls, faxes, text messages and mailed letters to phishing@irs.gov.
- Report suspicious IRS email charges received to your work email, using the Report Phishing Cofense button located in your Outlook toolbar.

Augusta Ada, Countess of Lovelace, is often referred to as the first person to recognize the full potential of computers. Having received a rare scientific education for her time period, Lovelace is now considered by many to be the first computer programmer and her method has been called the world's first computer program. Today at Brink's, we use a computer for a thing or two...

"Imagination is the discovering faculty, pre-eminently. It is that which penetrates into the unseen worlds around us, the worlds of Science."
